

FORENSIC NEUROPSYCHOLOGICAL ASSESSMENT

This will be an introduction to the use of neuropsychological assessment tools and approaches to forensic assessment. The emphasis will be on civil assessment, but the tools described can also be utilized in the area of criminal work. The proposed schedule for the 2 hour program is:

- A. Differences between forensic vs clinical assessments**
- B. The approach to forensic assessment**
- C. Interactions with referral sources**
- D. Appropriate tools to use**
- E. Ethical considerations**
- F. Report genesis**
- G. Developing a forensic neuropsychological practice**

The program will be presented in English and handouts will be provided. A number of tests will be presented during the presentation. Attendees are asked to bring questions and/or cases for discussion purposes.
